Claim Amendments

Claim 33 is being added in this Amendment. Claim 33 corresponds very similar to claim 1 except that instead of R^5 being the radical (W)-(X)-(Y)-Z, R^5 has the formula shown below. Support for R^5 having the below formula can be found in the specification on page 25, about lines 5-6. Support for R^{63} can be found on page 15, lines 14-18. No new matter has been added as a result of this amendment.

Formula of R^5 :

Applicants would like to further clarify the substituent group R^{56} in claims 1 and 6. Substituent group R^{56} is one of several R groups that may be substituted with either an unsaturated, saturated, or partially unsaturated mono, bi- or tricyclic ring of E having a maximum of 14 carbon atoms and 0 to 5 nitrogen atoms, 0 to 2 oxygen atoms, and/or 0 to 2 sulfur atoms wherein said ring may comprise up to two oxo groups. E is selected from a group consisting of hydrogen, $O-R^{52}$, $NR^{51}R^{52}$, $S-R^{52}$, and E. This group makes up Z of the R^5 being a radical (W)-(X)-(Y)-(Z).

R^{56} is a group $Q^1-Q^2-Q^3$. According to claims 1 and 6, Q^1 and Q^2 may be a bond and Q^3 can be a saturated monocyclic ring having a maximum of 14 carbon atoms, 0 to 5 nitrogen atoms, 0 to 2 oxygen atoms and/or 0 to 2 sulfur atoms. Applicant would like to clarify that Q^1 and Q^2 as recited in claims 1 and 6 could each be the same bond (namely, just one, single bond instead of two bonds). Applicants further submit that if both Q^1 and Q^2 were each recited to be a bond in claims 1 and 6 that one skilled in the art would recognize that such a recitation was intended to mean that Q^1 and Q^2 could in fact be just one, single bond, namely, the same bond.

In view of the above amendments and arguments, entry of this Amendment is respectfully requested.

REQUEST FOR RECONSIDERATION

Reconsideration is respectfully requested. Applicants believe that the present application is in condition for allowance. Should the Examiner have any questions or would like to discuss any matters in connection with the present application, the Examiner is invited to contact the undersigned.
